

PRESS RELEASE

Kverneland Group develops a new app for IsoMatch Tellus- IsoMatch OnTimeApp

7-11-2013, Nieuw-Vennep, The Netherlands

IsoMatch OnTimeApp

Kverneland Group is developing a new app for the IsoMatch Tellus – the IsoMatch OnTimeApp. The OnTimeApp can improve the efficiency of the work done in the field by displaying important information such as finishing time, efficiency score and remaining product. It allows the farmer to make important decisions to save time and costs.

How much time does it take to finish a task? is the task performed efficiently?
With the IsoMatch OnTimeApp these questions can be answered easily.

Simple idea, great results

When driving your car, the navigation system tells you exactly how much time it will take to reach your destination. This simple idea was the basis for the development of the IsoMatch OnTimeApp. The farmer can see immediately a time estimation for finishing his field's task. In addition he can view how efficiently he is driving and how much product is left so he could make the right decisions to save time and costs.

Share your success with farmer colleagues worldwide

With the IsoMatch OnTimeApp the operator can immediately share his efficiency score with colleagues and friends.

IsoMatch Tellus – always something to look forward to

Since the introduction of IsoMatch Tellus, Kverneland Group has introduced numerous new products and applications in the IsoMatch product range. Looking into the farmers needs, Kverneland Group is committed to keep offering new solutions and applications that make the work of the operator easier and will reduce costs.

For more information about IsoMatch products and apps please visit:

Availability

The IsoMatch OnTimeApp is free of charge and will be available as part of the IsoMatch Tellus software release in March 2014.

IsoMatch OnTimeApp will be displayed at Agritechnica (12-16 November 2013), Kverneland Group, Hall 5, Stand D38.

Kverneland Group is a leading international company developing, producing and distributing agricultural machinery and services. Strong focus on innovation allows us to provide a unique and broad product range with high quality. Kverneland Group offers an extensive package aimed at the professional farming community, covering the areas of soil preparation, seeding, forage and bale equipment, spreading, spraying and electronic solutions for agricultural tractors and machinery.
