

## PRESS RELEASE

### Vicon is Releasing a New Spreading Charts Application

17.09.2014, Nieuw-Vennep, The Netherlands

*Vicon spreading charts Application available for iOS and Android smartphones*

**Vicon will launch a new smartphone application to make it even easier to set up your Vicon fertiliser spreader. The App has a complete new design and a more user friendly navigation structure. Also new features like saving the advice etc. are added.**

#### **Availability**

Vicon will launch the App for Apple's iPhone (iPad, iPod touch) and smartphones with Android operating systems like Samsung and HTC phones. This new helpful Application will be available for free through Apple's App Store and the Google Play Store. By installing the new spreading chart App on your smartphone, you will get direct access to the results of specialised testing and fertiliser experience. In just some steps, the App will guide you to the right settings of your spreader, anytime, anyplace, anywhere for almost all commonly used fertiliser types.

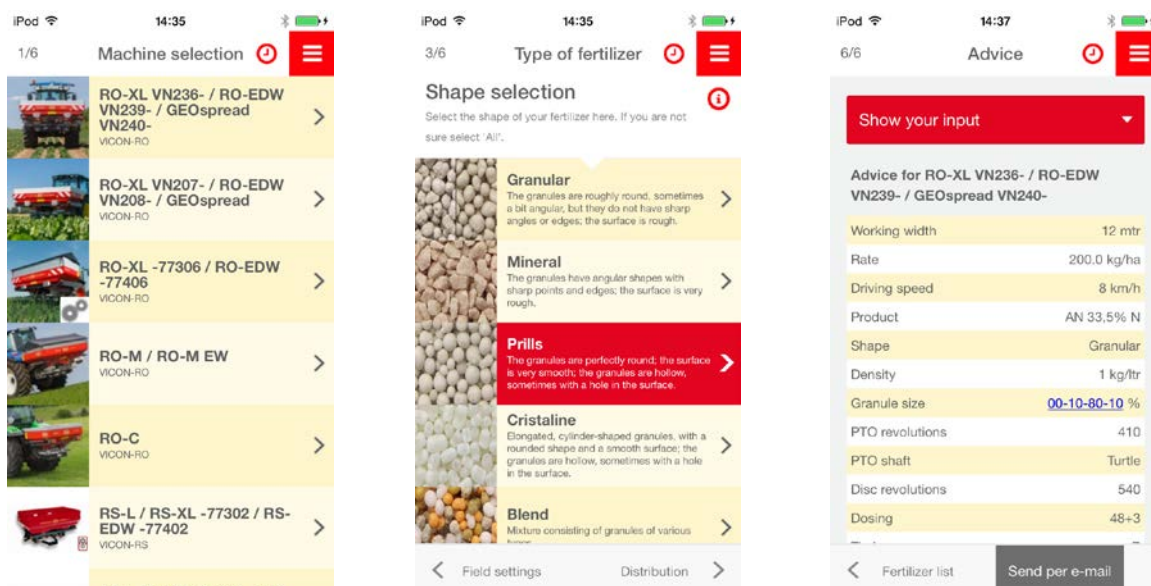

#### **User friendly**

The App is more user friendly and has an easy to use navigation structure. You just select your spreader model, enter the working width, application rate, driving speed and type of

application. As a next step you have to select the fertiliser type and enter the distribution and density of the fertiliser, which you can determine with the granule size box and a scale. Afterwards you will get the advice adjusted to your settings. By following these easy steps, you will be sure you get the best spreading pattern possible in the field.

## Languages

The spreading charts App will be available in the following languages: English (metric and imperial), French (metric and imperial), German, Dutch, Spanish, Polish, Romanian, Bulgarian, Latvian, Lithuanian and Estonian.

Number of Characters (with spaces) in Text and Main Heading: 1770
