

PRESS RELEASE

New ProLine four rotor Rake

Vicon Introduces its Andex 1304 four rotor Rake now additionally as PRO-Line

06/09/2018, Kerteminde, Denmark

Vicon launches its Andex 1304 now additionally as PRO-Line Model that delivers higher comfort with new ProLine functionalities.

Heavy duty solution for efficient farmers

Whereas the Andex 1304 is already equipped with standard features like separate front and rear rotor lift, very simple electronic control, high performance oil bath gear box, hydraulic adjustment of working and swath width on front and rear rotors, the 1304 PRO is additionally equipped with new solutions for becoming even more efficient.

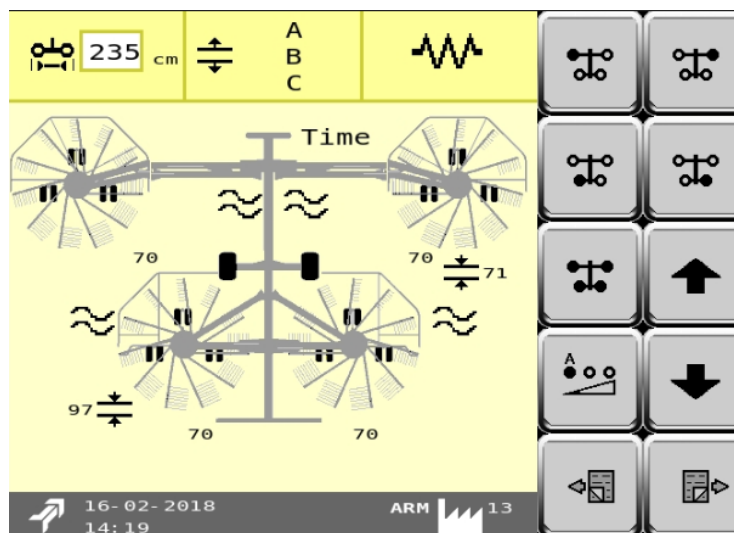

Individual lifting of all four rotors

Isobus solution for professional users

Beside the identical technical details to the Andex 1304, the PRO version comes up with advanced operation possibilities thanks to Isobus control. All Machine functions - operated now on load sensing system - are then easily controlled from each Isobus ready Terminal as for example Isomatch Tellus or Isomatch Tellus Go. With that, users get advanced opportunities to adjust and operate the rake according to their needs.

New functions:

- All 4 rotors can be lifted individually
- Folding and unfolding with just pressing one button
- Working width can be controlled from the terminal
- Possibility to save the swath width
- Different headland delay functions

Professional operation with Isobus settings

Easy to adjust

The new feature for electric height adjustment of all four rotors gives possibility to save the position of the rotors and recall them later. An easy set up thanks to Isobus control.

Minimum Maintenance Promotes High Uptime

The biggest improvement of Maintenance free raking is now as well transferred into this model. The machine is in season fully maintenance free. No time is wasted for greasing. This is realized thanks to the already known maintenance free gearboxes. Occasionally with that you can **Boost Your Work Day** and targeted on an efficient field operation.

This rake is making lighter work of tough and demanding operations. Being able to accurately feed the machine that follows and keep up efficiency of the complete harvesting system is an essential part of the raking job.
